City of Pottsboro Enacts Water Rate Increase Due to Rising Infrastructure and Source Water Costs

Pottsboro, Texas – The City of Pottsboro has enacted a necessary adjustment to its water rates, effective October 1, 2024.

The decision comes after a thorough review of the City's water utility operations and financial needs.

Reasons for Rate Increase:

1. **Increased Infrastructure Costs:** Significant investments are required to repair and upgrade aging pipelines, water treatment facilities, and storage tanks. These improvements are crucial for maintaining water quality, reliability, and safety.
2. **Higher Source Water Costs:** The cost of sourcing and treating water has increased due to various factors, including environmental regulations and the need for more advanced treatment technologies to ensure compliance with federal and state water quality standards.

The rate adjustment is designed to balance the need for continued investment in infrastructure with the goal of minimizing the financial impact on residents and businesses. Full rate information can be found at <https://ecode360.com/40621889#40621889>

We understand that rate increases are never easy, and we do not take this decision lightly.
